

## **Downloads – Videos**

### **Aerosoft A330 professional**

In this video, the beautifully rendered PBR texturing of this A330 release from Aerosoft becomes immediately apparent as the camera pans around the realistic-looking cockpit. Shots of the night lighting add additional atmosphere, while the sleek external lines of the A330 are also shown off to good effect. (Reviewed on pages 20-22.)

### **Aerosoft CRJ professional**

Opening with a wide shot of the CRJ's cockpit, this video highlights the sharply rendered details therein. Moving to the exterior view, the opportunity is taken to pan around the aircraft to highlight the attention to detail that has been lavished on the CRJ's exterior. From some angles, the aircraft looks almost photorealistic. (Reviewed on pages 24-26.)

### **Just Flight Robin DR400**

This video makes a point at the outset of initially using close-up views to highlight the attention to detail that has been paid to the exterior rendering of Just Flight's DR400. This includes things such as chipped paintwork on the propeller blades and nicely created panels that have depth to them. Internally, the 3D quality of the detailed instruments is shown off to good effect. (Reviewed on pages 40-42.)

### **DCS: JF-17**

You know you're in for a treat when a video opens with a close-up view of the aircraft's external panel lines and rivets. This video showcases the almost 'insane' level of detail that has been incorporated into this DCS release. Every shot is a closeup of pin-sharp detailing, most notable of which is in the cockpit area. The JF-17's full inventory of weapons is also put on display. Finally, the aircraft's awesome agility is showcased. (Reviewed on pages 68-71.)

### **vFlyteAir Simulations' Cessna 150**

As this video attests, for such a small aircraft, vFlyteAir has crammed a lot into this package. Features shown in this presentation include: animated rain effects, a kneeboard with interactive weight and balance and checklists, the pre-flight walk-around, visual fuel check, the ability to choose between male and female pilot, and trainer or commuter panels, plus a sample of the 14 included liveries. (Reviewed on pages 44-46.)
